CCSA103 Lab: Object Management

Check Point Certified Security Administrator (CCSA) R82 · Instructor: Bello Ridwan Olayinka

> ***Submission deadline: Friday, 6 November 2026.*** *Reports submitted after this date may lose marks.*

Lab at a Glance

Item	Detail
Goal	Create, modify and clone SmartConsole objects, then publish and verify your changes.
Environment	A-SMS virtual machine, accessed through SmartConsole from A-GUI
Time needed	1 to 1.5 hours
You will submit	One PDF or Word report with 4 screenshots and 4 short answers
Deadline	**Friday, 6 November 2026**
References	CCSA103 lab slides, the CCSA R82 course PDF, and the CCSA Lab Topology

1. Lab Topology (Alpha Site)

Use this table to confirm you are connected to the correct machines and to see where the objects in this lab fit.

Device or network	Role in this lab	IP address
A-GUI	Your workstation. Open SmartConsole here.	10.1.1.201/24
A-SMS	Security Management Server. You connect to it and create the objects on it.	10.1.1.101/24
A-SME	Secondary management server. You install the database on it in Task 5.	10.1.1.130/24
A-DMZ-NET	The DMZ network object you modify in Task 1.	192.168.12.0/24

The new host object in Task 2 sits inside the DMZ network range.

2. Before You Start

- ☐ Your lab VMs (A-GUI, A-SMS and A-SME (if you don't have, proceed with A-SMS only)) are powered on.
- ☐ You can log in to SmartConsole from A-GUI. Server: **10.1.1.101**, user: **cpadmin**.
- ☐ You have a blank document open for your lab report.
- ☐ You will take each screenshot as you go, not at the end.

- ☐ Every screenshot shows the full SmartConsole window, with the date and time visible if possible.

3. Naming Your Submission

Save your lab report as a single PDF or Word document using this exact format:

CCSA103_ObjMgmt_LastName_FirstName.pdf

Example: CCSA103_ObjMgmt_Smith_John.pdf

4. Part 1: Hands-On Lab Tasks

Task 1: Modify a Network Object

Setting	Value
Object	A-DMZ-NET
Color	**Orange**
Comment	**Alpha-Site Demilitarized Zone - Modified by [Your Name]** (use your own name)

1. Log in to SmartConsole on A-SMS.
2. Go to **Objects > Object Explorer**. Expand **Network Objects > Networks**.
3. Double-click **A-DMZ-NET**.
4. Change the Color and the Comment as shown in the table.
5. Click **OK**.

> ***Checkpoint:*** *A-DMZ-NET now shows an orange icon in the Object Explorer.*

Task 2: Create a New Host Object

Setting	Value
Name	**Student-Web-Server**
IPv4 Address	**192.168.12.150**
Comment	**Internal Web Server for Lab**
Color	**Sea Green**

1. From the **Objects** menu at the top, select **New Host...**
2. Enter the settings shown in the table.
3. Click **OK**.

> ***Checkpoint:*** *Student-Web-Server appears under Network Objects > Hosts with a sea green icon.*

Task 3: Clone a Service Object

> ***Important:*** *Do not clone https. Clone* ***http*** *as described below.*

Setting	Value

Setting	Value
Name	**http_Student_Custom**
Comment	**Custom HTTP for Lab**
Color	**Violet Red**
Port	Custom: **8081**
Advanced tab: Session timeout after (in seconds)	Specific: **120**

1. Go to **Objects > Object Explorer**. Expand **Services > TCP**.
2. Search for **http** (standard port 80).
3. Right-click the default **http** service and select **Clone**.
4. Enter the settings shown in the table.
5. Open the **Advanced** tab and set the session timeout.
6. Click **OK**.

> ***Checkpoint:*** *http_Student_Custom appears under Services > TCP, and the original http service is unchanged.*

Task 4: Grouping and Verification

1. Go to **Network Objects > Groups**.
2. Double-click **Alpha-Web**.
3. Add your new **Student-Web-Server** to this group.
4. Click **OK**.

> ***Checkpoint:*** *Reopen Alpha-Web and confirm Student-Web-Server is in the member list.*

Task 5: Publish and Install

Setting	Value
Session name	**Object Management Lab - [Your Initials]** (use your own initials)
Install Database targets	**A-SMS** and **A-SME**

1. Click **Publish** (top center).
2. Name the session as shown in the table.
3. Go to the top menu **Menu > Install Database**.
4. Select **A-SMS** and **A-SME**, then click **Install**.
5. Open **Recent Tasks** at the bottom of the window and verify the installation succeeded.

> ***Checkpoint:*** *The Install Database task shows **Succeeded** for both A-SMS and A-SME. If it shows a failure, check that A-SME is powered on and reachable from A-SMS, then try again.*

5. Part 2: Screenshot Evidence

Include these four screenshots in your lab report. Label each one (Screenshot A, B, C, D) and make sure your custom names and colors are visible.

Label	What the screenshot must show
Screenshot A	The properties window of **A-DMZ-NET** showing the Orange color and your custom comment.
Screenshot B	The properties window of **http_Student_Custom** showing port 8081, plus the Advanced tab showing the 120-second timeout.
Screenshot C	The **Alpha-Web** group properties window showing **Student-Web-Server** in the member list.
Screenshot D	Recent Tasks, or a success prompt, showing the Database Install completed on both A-SMS and A-SME.

Below each screenshot, write one sentence describing what it proves.

6. Part 3: Short-Answer Questions

Answer each question in 2-3 complete sentences, in your own words. Find the answers in your CCSA103 course PDF and lab slides.

1. What is a recommended best practice when dealing with default objects in SmartConsole, rather than editing them directly?
2. Name at least three different ways (menus or locations) you can manage or create objects within SmartConsole.
3. What is the Object Explorer, and what is one unique capability it has that the standard New menu does not?
4. According to best practices, why should you use Group Objects instead of adding individual objects directly to security rules?

7. How You Will Be Graded

Component	Weight
Lab execution and screenshots	60%
Short-answer questions	30%
Formatting and file naming	10%

8. Final Submission Checklist

- ☐ The file is named exactly **CCSA103_ObjMgmt_LastName_FirstName.pdf** (or .docx).
- ☐ Screenshots A, B, C and D are included, labeled and readable.
- ☐ All four short-answer questions are answered in your own words.
- ☐ The report is submitted by **Friday, 6 November 2026**.
